AWNINGS

Create the
perfect place to eat, drink and relax
with Lakeland awnings

Keep your customers coming back

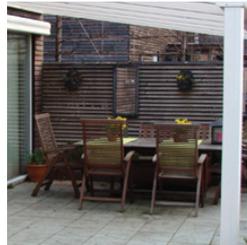

Beautiful Retractable Awnings

that'll keep your customers happy

Lakeland AWNINGS

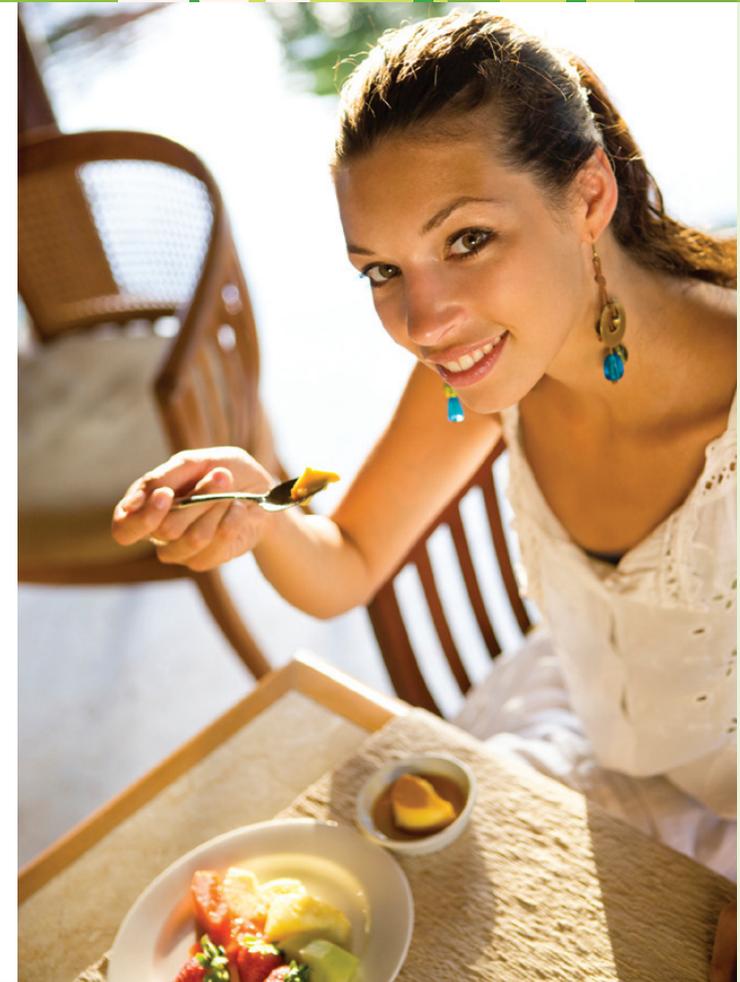

A shading solution from Lakeland Awnings can help you to create the perfect outside space. Built to last, our range of awnings and patio roof covers will enable you to turn unused outside areas into pleasant, profitable spaces.

With a wide choice of colours, designs and operations you'll be sure to find a shading solution that ideally suits your needs.

Extensively tested

All awnings are CE marked and comply with EN standard 13561:2004 for outdoor awnings. They have been tested for durability, wind loading and water loading.

 Max projection up to 3000mm

Fitted with a Somfy® Motor as standard.

Many more fabric designs available. Please ask to see our swatch book for the full range.

Lakeland Awnings Fabrics

Create an inviting atmosphere

Consider the atmosphere you wish to create, yellow and orange tones create a warming environment whereas blues and greens will set a cooling, calming tone. Think about how your awning will be used and pick a fabric to suit this.

Ultimate protection

Our fabrics have a UV rating of at least 90% (and 99% UVB radiation), regardless of the colour. You can choose from over 90 designs including plain colours, block stripes and special designs safe in the knowledge that your customers are adequately protected.

The fabrics are woven from 100% dyed polyacrylate fibres which give exceptional colour fastness against strong sunlight and weather. The fabric is also impregnated, ensuring complete resistance to dirt, oil, grease, algae and mould. This all simply means that for the lifetime of your awning the fabric won't fade or deteriorate.

Eye-Catching Advertising

Your awning can be specially designed with your corporate colours, logos and contact details to create a great advertising space.

Get the most from your awning; choose the ideal package for ultimate customer comfort:

Smart Awning

The awning is controlled by sun and wind sensors, closing when the wind picks up and opening when the sun comes out. You can be safe in the knowledge that your customers will be automatically protected from the sun.

Fitting more than one awning?

No problem. Several awnings can be linked on one remote control for ultimate convenience.

Get the recommended package!

Control

A convenient handset allows you to open and close the awning at the touch of a button.

Intelligence

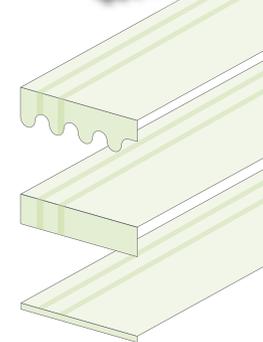

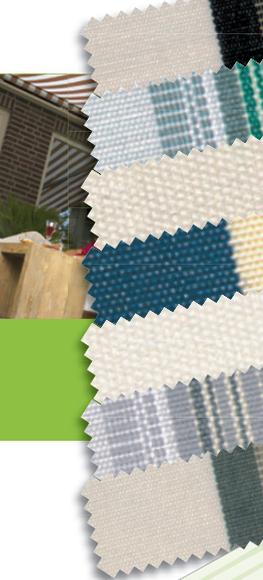

Sun and wind sensors will automatically adjust the awning to offer maximum protection.

Comfort

Lighting or heating can be added to make the most of the awning even after dark.

Care

Increase the life span of the awning by following the care instructions and by using the specially formulated cleaning kit.

Available with wavy, straight or no valance.
