weinor I 2000, K 2000, N 2000 – proven technology, timeless design

The I/K 2000 is the tried-and-tested, classic cassette awning – as an I 2000 without back-plate for level building facades, as the K 2000 with back-plate for uneven bases. The sturdy weinor awning with its support pipes can be used almost anywhere. As the decor on the front rail and the end caps suggest, the I/K 2000 tends towards a more traditional design. The optional LED light bar makes the awning part of any stylish evening. The N 2000 is an awning designed especially for niche fixing. With its unique flat front rail the awning disappears almost completely into the facade – with simple straight lines it is designed for a specific need, and is very common for installation above shop-fronts.

arm member

Product benefits in detail

Sophisticated design and technology: highlights of the weinor I/K/N 2000

I 2000: open cassette – perfect for wall installation

The I 2000 cassette awning is open on the side facing the wall.

- extremely well suited to wall mounting, e.g. beneath roof overhangs

- shapely front rail allows it to close precisely and provide perfect protection for fabric and fittings

K 2000: closed cassette – back-plate for extra protection

The K 2000 features an additional back-plate, completely closing it off.

- for every building situation

- back-plate profile makes it equally suitable for
 - wall installation
 - ceiling installation
 - rafter installation

N 2000: niche cassette – for flush fit at facade

The N 2000 is specially designed for niche installation.

- embedded in the building facade
- edge of front rail fits flush with the building facade
- tilting member closes the front rail firmly

Strong tilting arm member – extremely sturdy and secure

The tilting arm member with round steel linking chain is sturdy and durable.

- smart bearing technology stabilises the front rail
- withstands unilateral loads of up to 100 kg
- 10-year warranty on linking chain
- die-forged aluminium in all arm joints – light but highly robust

Multi-section units – to shade especially large areas

The I/K 2000 also comes as a combined multi-section unit for very large patios – coupled or in series.

- as a 2-part unit up to 1,200 cm
- jockey cover or sliding support with continuous fabric

- standard
- optional
- unavailable

Fabrics – attractive, brilliant long-lasting colours

For an attractive awning you need a high-quality fabric. The 'colours by weinor®' collections provide a wide selection.

- solution-dyed to make them colour-fast
- stay beautiful thanks to dirt- and water-repellant nano-coating
- optional: wide range of collections by other manufacturers

Acrylic fabrics
100 patterns

- high-quality acrylic
- proven for decades
- fabric width: 120 cm/240 cm

Polyester fabrics
55 patterns

- innovative polyester quality
- high-stretch with memory effect®
- fabric width: 120 cm

Wide range of frame colours – abundance of choices

weinor coats all of its products in its own workshop. This ensures that they have the best-possible colour tonality and identical gloss levels.

- 47 standard RAL frame colours, silk gloss (gloss level $70 \pm 5\%$ when measured at a 60° angle)
- 9 scratchproof, resistant trend colours with a textured look
- over 150 special RAL colours

weinor is an eco-friendly company. To ensure compliance with high environmental standards, manufacturing processes and materials undergo regular testing by experts.

As a result of the ban on the use of heavy metals in powder coatings, paint manufacturers can no longer guarantee colour stability despite making every effort to do so. It therefore cannot be excluded that colours in general, and Fire Red (RAL 3000) in particular, may fade with time. For technical reasons, the colours may appear significantly different when printed.

Remoto 1M/5M

Remoto 10M

WeiTronic UniLine – coordinated control for awning, light and heating (optional)

The awning comes as standard with one motor and can optionally be controlled with the pre-programmed WeiTronic remote control. There are

handheld transmitters with different numbers of channels: choose from 1, 5 or 10 channels with a display.

WeiTronic Remoto handheld transmitter

- safe to operate on protected frequency (868 MHz)
- range of up to 100 m
- simpler than a TV remote, attractive, convenient design

WeiTronic remote-controlled receiver

- various remote-controlled receivers depending on functions used
- to suit awning fittings – e.g. to extend and retract the awning or dim the lights

● available — not available

Agido vibration sensor – standard product protection

The integrated WeiTronic Agido-868 vibration sensor retracts the awning automatically when it senses vibrations (e.g. from gusts of wind).

- threshold value adjustable
- comes as standard in most width/ projection combinations (with some exceptions, see price list)

- only sold with WeiTronic
- energy-saving technology
- battery life 2 years
- automatic battery replacement system on registration
- awning remains in place approx. 20 minutes after retraction
- fitted into front rail

WeiTronic Sensero-868 AC 230

Sun, wind and rain sensors – automatically protect your product and prevent excess heat (optional)

The WeiTronic series remote sensors automatically extend the awning when the sun shines and reliably retract it in the wind or rain.

Available types:

- WeiTronic Sensero-868 AC 230 sun, wind and rain sensor
- WeiTronic Aero-868 AC 230 sun, wind and rain sensor (or solar-run WeiTronic Aero-868 solar)

Tempura Universal heating system, high-performance level (optional)

The energy-efficient Tempura infrared heating system has an impressive heating capacity of over 1,500 watt in a tiny housing.

- instant heat: no warm-up time
- turn as required for targeted warmth
- operate and dim using WeiTronic remote control
- splash protection
- comes in 47 standard frame colours plus 9 scratchproof, resistant trend colours with a smart, textured look
- option: 150 special RAL colours
- universal bracket makes it easy to retrofit
- TÜV tested

LED Design light bar – 30,000 hours of lighting with minimal energy consumption (optional)

Select LED components for top weinor quality:

- atmospheric light thanks to special glass lenses
- especially energy-efficient
- lifetime of 30,000 hours
- remote dimming with WeiTronic
- fitted to support pipe using angle bracket
- easy to service: simply replace individual LED lights without uninstalling the awning
- patent pending

Determining the diagonal and clearance height:

1. Find the diagonal by looking in the 'Diagonal' table for the terrace depth.
2. Using the diagonal from the table and the required pitch, consult the 'clearance height' table for the clearance height. This clearance height refers to a mounting height of 300 cm.
3. Add/subtract the difference between 300 cm and the actual mounting height to/from the clearance height in the table.

Determining the diagonal

This table can be used to find the awning diagonal for any given horizontal terrace depth.

Pitch	Terrace depth in cm					
	150	200	250	300	350	400
5°	150	200	250	300	350	400
15°	160	210	260	310	360	410
25°	170	220	270	330	390	440

Diagonal in cm (rounded figures)

Determining the clearance height

This table is used to find the clearance heights for various diagonals when the tilt angle is 5°, 15° or 25°.

This table is based on the example of an installation height of 300 cm (upper edge of awning).

Pitch	Diagonal in cm					
	150	200	250	300	350	400
5°	270	270	270	260	260	250
15°	250	240	220	210	200	180
25°	220	200	180	160	140	120

Clearance height in cm (rounded figures)

Cross-section of K 2000 with gear box (with back-plate)

Cross-section of N 2000

Installation on walls, ceilings or rafters – suitable for various building conditions

Its dimensions mean that the K 2000 can be mounted in a wide range of ways: not only on a wall but also on a ceiling or a rafter.

The I 2000, open at the rear, is designed for wall installation, while

the N 2000 is intended as a special product for niches. The brackets are made of extruded, powder-coated aluminium.

I/K/N 2000 extraction forces

Wall installation on C20/25 concrete with up to 200 mm of facing,
extraction force in N per upper fixing for wall bracket

The extraction force is the force with which the weight of the awning and the wind load pull on each upper fixing. The tables indicate this force in N per upper fixing. It varies depending on the awning size and the wall bracket/mounting plate used.

Selecting the wall bracket and anchoring system:

1. Consult relevant table for extraction force per fixing for selected awning size.

2. Select a wall bracket/mounting plate for which there is a fastener which can resist the indicated extraction force. Remember to take into account the spacing, the area which will be damaged if the fixing breaks out, the type of fixing used and the assembly base.

See separate bracket overview for other bases.

 1 standard wall bracket (85 mm) plus
1 standard wall bracket (85 mm) as a
