Spend more time outdoors with weinor awnings

The weinor awning highlights

Design

Design is a question of style – uncompromisingly beautiful shape

Whether classic or avant-garde, weinor awnings stand out for their high-quality materials and aesthetic look and shape. The result is ultramodern technology in a contemporary design. Feel free to choose the awning that best meets your personal tastes and furnishings.

Premium quality
Made in Germany

For many years now, weinor has consistently driven innovation in awning design and technology. With its new generation of awnings, weinor is once again raising the bar. At the core of these developments are three aspects.

The foundation for our success: maximum technical expertise and uncompromising quality standards.

Convenience

Technology

For long evenings on the patio – atmospheric LED lighting

Every awning is optionally available with integrated LED lighting or different light bars. Select LED spotlights cast a pleasant, warm white light even when the awning is retracted. Operate and dim your awning using weinor BiConnect, radio control. The very energy-efficient LED spotlights last for 30,000 hours.

True to its name – the weinor LongLife arm

The appeal of the low-noise weinor LongLife arm is its very high tension force – even in gusty conditions. This ensures the fabric is exceptionally well positioned. Its resilient high-tech belt has undergone 100,000 cycles in a fatigue test. We back this up with a 10-year warranty. Drop-forged aluminium has been added to the arm joint for even greater stability.

Over 150 weinor fabric patterns

Wonderful fabrics for every type of awning

The new weinor fabric patterns add an aesthetically pleasing look to your patio! Teflon EXTREME® finishing makes weinor fabrics water and dirt repellant. What's more, the spinneret dyeing process, which locks the pigment into the fibres, gives them their consistently brilliant colour.

weinor true colours is our exquisitely colourful acrylic fabric collection. The fabrics are outstandingly durable and come in radiant colours – for beautiful patterns designed to last.

The hallmark of weinor magic colours is its vibrant patterns and high-stretch polyester which retracts to its original smooth state in warm conditions (weinor Memory-Effekt®).

Vertical sun protection fabrics with a crystal-clear view

weinor Perluca, the fabric collection with breaks arranged at regular intervals, offers airy sun protection and privacy. For Valance Plus or Paravento.

Alternatively, you could opt for the high-tech Soltis® vertical sun protection fabric developed by Serge Ferrari. Its micropores make it especially air-permeable.

9 WiGa trend colours

An immense range of cutting-edge frame colours

weinor's magnificent nuances will colour your life. Everyone is certain to find their favourite colour here: with over 200 different frame colours from weinor to choose from. Let us inspire you!

weinor provides a maximum degree of colour uniformity

As weinor does all the powder coating in its own workshop, you can also rest assured that different products come with the same top-class colour tonality and identical gloss level.

Choose from an abundance of high-quality colours:

- 47 standard RAL frame colours, silk gloss
- 9 scratchproof, resistant trend colours with an elegant textured look
- over 150 special RAL colours

weinor is an eco-friendly company. To ensure compliance with high environmental standards, manufacturing processes and materials undergo regular testing by experts.

As a result of the ban on the use of heavy metals in powder coatings, paint manufacturers can no longer guarantee colour stability despite making every effort to do so. It therefore cannot be excluded that colours in general, and Fire Red (RAL 3000) in particular, may fade with time. Colours may differ significantly due to the printing process.

weinor Cassita II – a gem amongst cassette awnings

Elegant design and full of brand new technology. With it's puristic shape and ultra-slim cassette, the Cassita II is the perfect awning for modern domestic trends - with various options for added comfort and convenience.

Youthful living with slim cassette design

For contemporary home decor aficionados: the outstanding feature of the Cassita II is its puristic, harmoniously flat, oval-shaped design

- beautifully-shaped aluminium end caps
- concealed fixings and cover caps
- easy end-fix installation with only two brackets

High-performance technology in the smallest of spaces

Fully sheltered: inside the cassette is the very latest in weinor awning technology.

- durable and very quiet weinor LongLife arm (10-year warranty)
- torsion-resistant OptiNut roller tube for widths up 5.5 m

LED lighting – long evenings on the patio included

Pleasant summer evenings on your patio – the Cassita II LED provides warm, white atmospheric LED light.

- LED spotlights registered for patent

- highly energy efficient
- operating life of 30,000 hours
- infinitely dimmable when used with BiConnect radio control
- can be used even when awning is retracted

Simply intuitive.

Intelligent accessories for greater comfort

weinor awnings raise the bar in patio and balcony sun protection. This is due in no small part to the numerous optional accessories that make comfort the weinor way so unique. weinor's well-engineered technology satisfies even the most demanding tastes.

Valance Plus – the side privacy and sun protection screen

With the Valance Plus, you get to choose the fabric for your main awning. If you want to be able to see out at the same time, look no further than our Perluca sheer acrylic fabric or Soltis® high-tech climate-control fabric as your best options.

Paravento – side privacy screen at a flick of the wrist

Another way to enjoy greater privacy is to open out a side screen: the Paravento provides exceptional shelter from the wind and prying eyes, in a fabric and colour to match the awning if so desired.

Tempura heating system – cosy warmth on cooler days

Pleasant, instant heat without any pre-heating: the energy-efficient Tempura infrared heater delivers a heat output of over 1,500 watts. Very easy to operate and dim using the weinor radio control.

State-of-the-art radio electronics for patio comfort

Tempura heating system

LED light bar systems

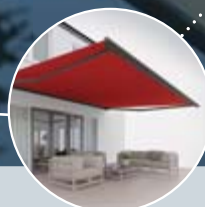

Valance Plus

BiConnect weather sensors

Motorised weinor awning

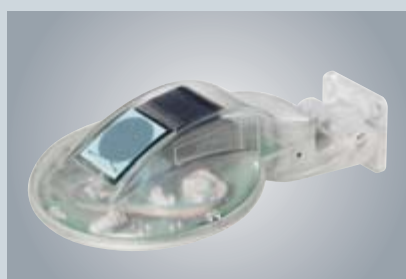

Alternatively, you can control your Alfresco living products with io-homecontrol® by **somfy**.

BiConnect radio controls – the relaxed way to operate awnings

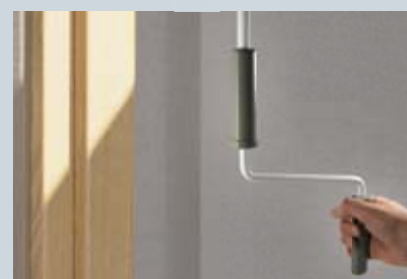

Operate your awning, heating and lighting with the weinor BiConnect radio control system. Using a pre-programmed BiEasy hand transmitter with or without a display; in silver or black – or even using the BiEasy app.

Weather sensors – automatically react to wind and weather

They open your awning automatically when the sun comes out and can optionally retract it in the rain and wind:

- sun sensor
- sun and wind sensor (solar-powered version also available)
- sun, wind and rain sensor

Gear drive – for when the conditions require it

You can also open and retract your awning using a gear handle if preferred. For example, if it isn't possible to connect to a power supply. This is an equally good solution if you use your awning very rarely.

“Made in Germany” – award-winning technology and designs

For over half a century, we have pursued the same mission: customer satisfaction. As a medium-sized, international company, weinor’s quality is as good as it gets and “Made in Germany”. All our products are designed and manufactured in Germany.

Outstanding Design

Timelessly classic or puristically modern: with a weinor product any outdoor area will become an extension of your living space. Numerous design awards bear testimony to our commitment to provide good designs:

- Focus Open 2014 Silver for Cassita II full cassette awning
- red dot award 2014 for the Zenara and Cassita II full cassette awnings
- iF product design award 2014 for the Zenara, Opal Design II and Cassita II full cassette awnings
- German Design Award Special Mention 2014 for the Zenara and Opal Design II full cassette awnings
- Good Design Award 2013 for the Zenara full cassette awning
- Focus Open 2012 for the Zenara full cassette awning
- iF product design award 2011 for the Plaza Pro sun shading system
- red dot design award 2009 for Terrazza Glasoase® cold roof conservatory
- red dot design award 2008 for the VertiTex vertical sun protection

Embodying innovation

Innovation plays a central role at weinor: this applies to our products, which set the highest-possible standards with their ultramodern engineering, and every element of our corporate culture alike. It was not without reason that weinor has been recognised as one of the top 100 most innovative German companies.

Tried and tested weinor quality

Defined work flows and manufacturing processes ensure that our products always meet the same high levels of quality. Numerous certifications are testimony to this.
