You can switch off when they are switched on:
smart accessories to make life easier
on your patio

With its LED light bars, Tempura heating system and remote-control operation, weinor is raising the bar when it comes to patio convenience. On long evenings and during cooler seasons, the light bars and heating system create a pleasant light and keep you warm and cosy – so you can use your patio for longer. The WeiTronic remote control system makes things even more convenient and easy to operate. All accessories perfectly complement weinor's products – easy to use with a small number of self-explanatory functions and easy to service as the receivers are easily accessible.

Overview of high-convenience products

weinor accessories: smart products to make life simpler – absolutely reliable and easy to control

Remoto 1M/5M

Remoto 10M

WeiTronic remote control – reliable, simple and convenient

WeiTronic remote controls make operating awnings/shades, patio lighting and patio heating convenient.

- secure radio transmission on 868 MHz radio frequency
- current standard controls are unidirectional (UniLine)
- in future, controls will increasingly be bidirectional (BiLine)
- various handheld transmitters available, some with display and menu
- receiver can be installed externally to make it easy to replace or integrated into the product for a neat appearance
- fit the ideal motor for each use

Sun, wind and rain sensors – automatically protect your product and keep out the sun

The WeiTronic series remote sensors automatically extend the awning when the sun shines and reliably retract it in the wind or rain. Available models:

- WeiTronic Sensero-868 AC 230 sun, wind and rain sensor
- WeiTronic Aero-868 AC 230 sun and wind sensor (or solar-run with a WeiTronic Aero-868 solar)

weinor LED technology – atmospheric and energy-saving

Select LED components for top weinor quality.

- atmospheric light thanks to special glass lenses
- long-lasting light-emitting diodes: 30,000 hours with minimum energy consumption
- individually replaceable LED spotlights
- dim to any level with WeiTronic
- can be delivered ready-integrated into various weinor products or separately as an LED or LED Design light bar
- patent pending

High-performance Tempura Universal heating system

The energy-efficient Tempura infrared heating system has an impressive heating capacity of over 1,500 watt in a tiny housing.

- instant heat: no warm-up time
- turn as required for targeted warmth
- operate and dim using WeiTronic remote control
- splash protection
- comes in 47 standard frame colours plus 9 scratchproof, resistant trend colours with a smart, textured look
- option: 150 special RAL colours
- universal bracket makes it easy to retrofit
- TÜV tested

Extremely convenient to operate –
with weinor remote-control systems

WeiTronic remote controls make operating awnings/shades, patio lighting and patio heating extremely convenient. This is thanks, on the one hand, to the tried-and-tested UniLine control technology, and recently also thanks to the interactive BiLine technology.

WeiTronic weather sensors extend the patio awning automatically when the sun comes out, creating pleasant shade. If vertical awnings have been fitted, these ensure that your home stays cool inside even in the heat of the summer. The sun protection unit closes automatically in the wind or rain.

Remoto 1M/5M

Remoto 10M

WeiTronic UniLine – tried-and-tested operating convenience

With UniLine technology, you can only tell whether information has been received from the product you are operating: the receiver does not send back any signal.

- 868 MHz radio frequency: reliable and simple to use
- usually pre-programmed, and also easy to set up
- various weather sensors to suit each purpose

WeiTronic remote control

BiEasy 15M handheld transmitter

WeiTronic BiLine – future-proof operating convenience

BiLine technology: all the UniLine features, and more besides:

- The receiver sends the handheld transmitter feedback, saying that it has received a command and is obeying it. This is displayed by the handheld transmitter.
- When several receivers are used, they communicate with one another to ensure that the information is received (routing).
- This technology is coming into increasing use at weinor (launched in 2013 with VertiTex).

How routing technology works*

This is how the signal is forwarded (routed) from one remote-controlled receiver to the next – any obstacles are circumvented.

* Very simplified illustration

↔ = Routing signal and feedback signal

WeiTronic UniLine – modern user convenience

○ included
— unavailable

Pure convenience: with just one handheld transmitter, users can operate all the weinor products on and around their patio and can

see straight away how these react. No feedback from the receiver. Reliable and uncomplicated – and extremely simple to set up.

 Remoto 10 M	10	○

WeiTronic BiLine – future-proof operating convenience

The receiver sends the handheld transmitter feedback, saying that it has received a command and is obeying it. This is shown on the

handheld transmitter display. Absolutely simple – programming is child's play.

The WeiTronic Combio series always gets a good reception

WeiTronic UniLine receiver	Used for	Type of plug
Combio-868 MA	awning motor	integrated Hirschmann coupling, 5 m lead, no plug attached
Combio-868 MA-K	Opal Design II awning motor or supplied during servicing	integrated Hirschmann coupling, 10 cm lead, Hirschmann plug
Combio-868 MVLED	awning motor + Valance Plus motor + LED light incl. dimming	weinor system plug, integrated
Combio-868 MVL	awning motor + Valance Plus motor + halogen light incl. dimming	weinor system plug, integrated
Combio-868 MLED	awning motor + LED- light incl. dimming	weinor system plug, integrated
Combio-868 ML	awning motor, halogen light incl. dimming	weinor system plug, integrated
Combio-868 LED	LED/Design light bar, incl. dimming	weinor system plug, integrated
Combio-868 LD-AB	phase control dimmer, suitable for many electronic transformers and filament lamps up to 350 watts	weinor system plug, integrated
Combio-868 LD-AN	phase control dimmer, suitable for ventilators, wound core transformers and filament lamps up to 350 watts	weinor system plug, integrated
Combio-868 HD	heating incl. regulation of heat to any level	6.5 m lead with Schuko safety plug
Combio-868 ST	wireless socket to switch any devices up to 2,000 watts (only for use in dry rooms)	Schuko safety plug, integrated

Depending on the product, the receiver is positioned in the awning housing or attached outside the housing. The WeiTronic Combio-868 MA/HD receivers are splash-proof in accordance with IP 56.

The power cable used depends on the combination of products ordered. In most cases, the model will include a white cable with a Schuko safety plug.

The Schuko safety plug is suitable for getting the awning up and running quickly. In the long term, permanent cabling is required.

Combio name plate with numbers for ordering spare parts and reporting faults

Recommended: Combio MA/HD additional protection in the horizontally mounted designer bar

Designer bar, length: 330 mm, Item number 109070-0000

WeiTronic weather sensors

The automatic WeiTronic awning controls guarantee the best-possible product and sun protection. Depending on the sensor type, they auto-

matically extend the awning when the sun comes out, and (optionally) retract it in the rain or wind.

WeiTronic sensor	Functions	Data transmission			
		Connection	Wireless remote sensor	UniLine	BiLine
 <p>Sensero AC 230 Plus</p>	Combined sun, wind and rain sensor – automatically retracts the awning in the wind or rain and extends it again when the sun comes out.	230 V	—	○	○
 <p>Aero AC 230</p>	Sun and wind sensor – automatically extends the awning in the sun and retracts it in the wind.	230 V	—	○	○
 <p>Aero-868 Solar</p>	Sun and wind sensor – automatically extends the awning in the sun and retracts it in the wind. Runs on a solar cell (not suitable for privacy screens).	—	○	○	○
 <p>Lumero-868</p>	Sun sensor – automatically extends the awning in the sun. Runs on a solar cell.	—	○	○	○
 <p>Agido-868</p>	Product protection sensor, battery-run – retracts the awning when it senses vibrations and movement (e.g. gusts of wind).	2x1.5V, AAA	○	○	—

○ optional
— unavailable

When weather sensors are combined:

1. if circumstances are unfavourable, waiting times may accumulate.
2. wind-triggered control takes priority over manual operation.

Energy-saving LED technology in a timelessly lovely design

weinor LED light bars add that special touch to any patio: their warm glow creates attractive lighting while allowing the patio to be used for much longer. Based on modern LED technology, the innovative light bars can save a great deal of energy. What is more, the light-emitting diodes have a long lifetime of some 30,000 hours, also helping to save resources. The weinor LED light bars can be operated and even dimmed using WeiTronic remote-control technology.

LED light bars – 30,000 hours of lighting with minimal energy consumption

With their timelessly lovely design, the weinor light bars match more than just weinor products:

- Made in Germany: developed by weinor, guaranteeing quality and spare parts availability
- individual LED lights can easily be replaced
- lifetime of 30,000 hours
- energy-saving: 85% less than halogen lighting
- dim to any level with the WeiTronic remote control

Save on operating costs with LED: positive result in terms of performance and consumption

Save with every single LED spotlight:

- as much light as a 20-watt halogen spotlight but uses 85 % less energy
- weinor's 2.6-watt LED lamps produce 187 lumen (lm) of light
- a 20-watt halogen spotlight produces 200 lm of light using 7 times as much energy

Save even more on a width of 6.5 m:

- with its 11 LED spotlights, the weinor LED bar delivers 2,057 lm of light in all.
- by comparison, the conventional weinor halogen light bar has 7 spotlights and delivers 1,400 lm of light in all.
- that makes about 50% more light for the same price.

Size and number of LED lights (LED and LED Design light bars)

Width of light bar	Number of separate LED spotlights
150 – 164 cm	2
165 – 219 cm	3
220 – 274 cm	4
275 – 329 cm	5
330 – 384 cm	6

Awning width	Number of separate LED spotlights
385 – 439 cm	7
440 – 494 cm	8
495 – 549 cm	9
550 – 604 cm	10
605 – 650 cm	11

The LED spotlights in the light bars are generally positioned symmetrically. In the case of multi-section

units, the spacing at the section joints may be irregular.

LED light bar mounting version with angle bracket for ceiling installation

LED Design light bar mounting version with adjustable bracket for wall installation

Set of brackets to attach LED light bar and set distance from wall or product

LED Design light bar mounting version – installed on Terrazza roof support

For further information on combinations and attaching the LED Design light bar to weinor products, please see the technical information brochures for the products in question.

Tempura patio heating – a big performance from a small heater

The weinor Tempura heating system provides instant, cosy warmth indoors and out. The neat appearance of this small heater fits in with any architectural style. The energy-efficient infrared heating can be retrofitted to complement any weinor product and brings a pleasant warmth to any other existing patio setup. When operated using the WeiTronic remote control, the Tempura heating can be set to any level.

Cabling	1.5 m cable, Hirschmann coupling and Schuko safety plug
Quality	
	TÜV-tested splash protection, IP 24, protection rating I

Energy-saving infrared heat as soon as you switch it on

The effect of the heating system's warm infrared rays can be felt as soon as you turn it on. No need for long heat-up times as with other

heating systems, e.g. medium-wave heaters. Combined with the WeiTronic remote control, you can heat to any level with the Tempura.

Swivelling housing – easy to install

The Tempura housing can be swivelled up and down to any angle – up to 40° when mounted on a wall and up to 70° on a ceiling. This allows for perfectly targeted heating.

The Tempura can be fitted to any wall using the universal bracket. It can also be attached straight to the Opal Design cassette awning using a special bracket.

Protected against overheating and splash-proof

Integrated cooling fins and an open construction reliably protect the housing against overheating.

The Tempura is constructed for outdoor use. No extra splash protection is required, e.g. a pane of glass. TÜV tested, protection rating I, protection type IP 24

Wide range of frame colours – abundance of choices

weinor coats all of its products in its own workshop. This ensures that they have the best-possible colour tonality and identical gloss levels.

- 47 standard RAL frame colours, silk gloss (gloss level $70 \pm 5\%$ when measured at a 60° angle)
- 9 scratchproof, resistant trend colours with a textured look
- over 150 special RAL colours

weinor is an eco-friendly company. To ensure compliance with high environmental standards, manufacturing processes and materials undergo regular testing by experts.

As a result of the ban on the use of heavy metals in powder coatings, paint manufacturers can no longer guarantee colour stability despite making every effort to do so. It therefore cannot be excluded that colours in general, and Fire Red (RAL 3000) in particular, may fade with time. For technical reasons, the colours may appear significantly different when printed.
