

ERHARDT J

ERHARDT J

THE PROVEN CASSETTE AWNING, WHICH IS
IMPRESSIVE DOWN TO THE LAST DETAIL

ERHARDT J

DESIGNED DOWN TO THE LAST DETAIL

The entire mechanism as well as the fabric are hidden in the cassette awning when in the retracted position. This ensures maximum protection from the elements while at the same time providing an unobtrusive appearance. The integrated internal gutter ensures controlled drainage. A sealing lip ensures the perfect seal of the cassette and enables gentle, quiet closing. In addition, the various brackets offer a visually and technically appealing solution for almost every mounting situation. A remote control for the motor offers even more freedom and can be ordered as an option. Durable materials and high-quality craftsmanship form the basis for sophisticated functionality.

ERHARDT J

ONE PRODUCT – MANY OPTIONS

Design

The ERHARDT J is timelessly elegant with its form language. The drop profile fully attaches itself to the cassette in its closed state, which is thus perceived as a unit.

All-round protection

The entire mechanism as well as the fabric are hidden in the cassette awning when in the retracted position. This ensures maximum protection from the elements while at the same time providing an unobtrusive appearance.

Folding arms for maximum load

A robust mechanism in the arm middle joint with a special stainless steel flyer chain guarantees durability, high stability and extreme strength.

Customised angle adjustment

The awning's inclination angle of 0° to 40° is infinitely variable and can be adjusted with ease via an opening in the side cover. This allows you to adjust the shade individually for your outdoor area.

Lighting and comfort

The practical lighting rail is attached to the bottom of the awning via special brackets and ensures optimal lighting even in large areas. The desired brightness can be controlled perfectly using simple dimming.

Mounting brackets

The robust mounting brackets for wall, ceiling or rafter mounting are made of high-quality aluminium and thus guarantee secure support for the awning in many mounting situations.

CE Made in Germany

All ERHARDT Markisenbau awnings are made in Burtenbach, Bavaria. All-round service and continuous production control guarantee high quality.

ERHARDT J AT A GLANCE

All of the ERHARDT J features

| | |
|--------------------|--|
| Maximum dimensions | 500 x 325 cm (width x projection length) |
| Technology | Quiet electric motor, folding arms with warp |
