

ERHARDT PM

ERHARDT PM THE PERGOLA AWNING FOR FLEXIBLE WEATHER PROTECTION

ERHARDT PM

MAXIMUM FLEXIBILITY FOR YOUR FAVOURITE SPOT

The pergola awning ERHARDT PM offers you the best awning and terrace roof – allowing you to enjoy either pure sunshine or a comfortable refuge in the shade at the touch of a button. The slim design of the Erhardt PM with side guide rails and an extra large shaded area (maximum 30 m²) is the perfect outdoor partner for many weather conditions. Erhardt offers a variety of lighting options or vertical shading options. The new special feature of the ERHARDT PM is the optionally integrated vario-volance in the drop profile, thus you can create your personal refuge. Furnish your favourite outdoor spot according to your individual taste.

ERHARDT PM

ONE PRODUCT – MANY OPTIONS

Design

The ERHARDT PM is a pergola awning with a high-quality aluminium cassette providing optimum all-round protection for the fabric and mechanism. Side guide rails are attached to the cassette ends and extend the awning fabric perfectly to the supports, the end of the projection. The combination of guide rails and supports makes the pergola awning exceptionally stable. It is also suitable for windy areas unlike open folding arm awnings.

Awning fabric with a zip function

As standard, the new guide rail is always designed with the lateral zip function on the fabric, meaning that there is no longer a light gap between the fabric and lateral guide rail. The zip function is possible up to an awning fabric size of 30 m².

Easy mounting

Various bracket versions enable mounting even on challenging facades, and a variety of different brackets are available for this purpose. The connection between the support and guide rail looks elegant and modern due to the use of a functional clip bracket.

Additional privacy and sun protection

The ERHARDT PM can also be equipped with a vario-volance. For convenient operation of the awning, the PV module can be mounted on either side of the drop bar. This provides additional privacy and protection when the sun is low at the touch of a button. The fabric allows you to look out into your garden while protecting you from curious inward glances.

Multi-part units

The ERHARDT PM can be coupled. This means that even larger areas can be shaded with multiple units. Series mounting allows any number of units to be combined.

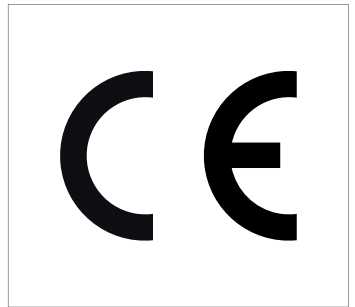

The perfect evening ambiance with light and warmth

Thanks to the atmospheric, optional lighting with modern LED strips in the cassette housing and/or in the guide rails, you can spend cosy evenings on your terrace. The optional infrared heaters provide pleasant heat. The comforting heat is noticeable within a very short time. Enjoy your evenings to the full.

CE Made in Germany

All ERHARDT Markisenbau products are made in Burtenbach, Bavaria. All-round service and continuous production control guarantee high quality.

ERHARDT PM
