

Awning System

markilux syncra flex / syncra uno flex

The ideal awning frame system with the minimum of space requirements – stylish sun and wet weather protection for large areas.

Product characteristics

Wind resistance class 2

Beaufort 5 -> 7.5-10.4 m/s / 28-37 km/h / 17-23 mph

1 combination example with the markilux 5010, round post

combination example with the markilux pergola, round post

2 available with either round or square posts

continuous bracket fixture slots with plastic fillet ¹⁾

3 cabling is run through maintenance ducts

4 stabilisation box syncra flex, open at the top

stabilisation box syncra uno flex, open at the top

1) optional configuration

Product characteristics

Description

- free-standing aluminium frame system for the installation of markilux awnings on both sides (flex version) or on one side (uno flex version).

Special features

- free-standing protection against sun and rain – water drainage guaranteed if the awnings are set at a min. pitch of 14°
- the perfect solution especially for commercial, hotel and gastronomy requirements or listed buildings
- a post-free area under the awning
- awnings can be operated independently of one another
- support posts optionally round or square, incl. stabilisation boxes for installation in any location
- posts with integrated cable ducts and maintenance cover
- aluminium frame system including top cover profile
- syncra uno fix enables installation of awnings close to a wall when direct fixture to the wall is not advisable
- powder coating available in seven markilux standard frame colours or in non-standard colours
- for configuration options, colours and dimensions please consult the chapter of the corresponding awning model in the sales manual

Dimensions

- maximum field width 700 cm
- standard support post height 320 cm, which is also the maximum height
- posts available in intermediate heights

Awning profiles

- extruded aluminium, in façade quality, powder coated
- support posts round Ø 140 mm or square 125 × 125 mm
- stabilisation boxes made of sheet aluminium length 2000 × height 450 × width 500 mm (a ballast weight of at least 625 kg in the form of gravel, sand or pebbles is required)
- rectangular cross-beam, height 140 mm × width 80 mm

Optional accessories

- markilux infrared heater
- markilux spotlight LED
- top covers for stabilization boxes made of sheet aluminium, powder coated or wood look (in WPC, graphite-grey, highly colour fast)
- wide range of brackets for the installation of folding-arm and pergola awnings as well as heating and lighting accessories
- plastic fillet available (in white RAL 9016 or anthracite ≈ RAL 7016 for the bracket slots in the cross-beam)

markilux planning service

in the case of larger construction projects, markilux can offer comprehensive planning support on request. Based on the dimensions and photographs supplied, on request we are able to offer the following services:

- a realistic photographic representation of the shading system in colour, optionally also as a 3D visualisation
- suggestions for special solutions
- technical drawings depicting possible solutions; they can also be used to accompany building permit submissions
- further consultation services up to final issue of order

a realistic photographic collage and a detailed technical presentation improve the quality of on-site consultation and the chance of success!

Planning permission

N.B! Please note that shading systems may be subject to compulsory planning permission regulations depending on the region!
