ERHARDT HS

THE CONSERVATORY AWNING FOR
YOUR HOME AMBIENCE IN THE SHADE

 **ERHARDT[®]
MARKISEN**

ERHARDT HS – THE PERFECT SHADE SOLUTION FOR EVERY ROOF

Every conservatory is as individual as you are. The shading of large glass surfaces is a challenge that we are happy to accept and solve with the ERHARDT HS conservatory awning. The individual, planable customised production of the on-roof or under-roof awning provides optimum sun protection for your home. A special feature of the ERHARDT HS is the flexible mounting option. It can also be used as a shading option for skylights. The modern awning fabric not only provides shade, but the extensive range of colours enables you to create your relaxation space. Take pleasure in having a break and enjoy your terrace at pleasant temperatures under the awning. You can always control the extension and retraction of the ERHARDT HS awning at the touch of a button, depending on the position of the sun and the season.

ERHARDT HS

ONE PRODUCT – MANY OPTIONS

Smooth operation and easy mounting

Guide rails with an integrated positive guide ensure the smooth and durable operation of the awning. The connection between the support and guide rail looks elegant and modern due to the use of the functional clip bracket.

Awning fabric with a zip function

As standard, the new guide rail is always designed with the lateral zip function on the fabric, meaning that there is no longer a light gap between the fabric and lateral guide rail. The zip function is possible up to an awning fabric size of 30 m².

Easy to use

Operate your conservatory awning conveniently from your favourite spot via the remote control motors and control unit. The use of additional sensors, such as automatic wind and sun control and a rain sensor, provide the exact protection you need and a pleasant atmospheric environment.

Multi-part units

Mounting the ERHARDT HS in series allows any number of units to be combined. This means that even larger areas can be shaded with multiple units. The profiles fit harmoniously and elegantly into the overall look of the awning.

The perfect evening ambiance with light and warmth

Thanks to the atmospheric, optional lighting with modern LED strips in the cassette housing and/or in the guide rails, you can spend cosy evenings on your terrace. The optional infrared heaters provide pleasant heat. The comforting heat is noticeable within a very short time. Enjoy your evenings to the full.

Made in Germany

ERHARDT Markisen produces all products in Burtenbach (Bavaria). All-round service and continuous production control guarantee high quality and a long service life.
